

STARPLUS®

Electronic Key & Hybrid Telephone System

Today's business environment demands both dependability and functionality from telephone communications systems. STARPLUS meets this challenge with reliable systems that provide a wide range of features and capabilities. STARPLUS Key Telephone Systems are designed to accommodate businesses requiring 3 to 24 stations.

The STARPLUS 308 supports up to 3 lines and 8 stations and has features normally found only in large systems. It is the perfect starting point for any small business. The 616 adds additional enhanced features to the 308 capabilities with 6 lines and 16 station capacity. The 1224 provides 12 lines and 24 stations to accommodate an even larger office environment.

The Microprocessor based architecture of the STARPLUS Electronic Key System combines digital control and stable, trouble-free operation. A wide variety of features are found in every system which add sophistication only found in larger telephone communication systems. Some of the features that improve call processing include Attendant Station, Hold Recall, Direct Station Selection, Busy Station Indication, and One-Touch Call Transfer. The STARPLUS 616 and 1224 add several more features, including User Programmable Buttons, Display Phone Operation, and SMDR Output.

STARPLUS Electronic Key Telephones are available in three models; Basic, Enhanced and Executive. The Basic model is a 14 button key telephone that provides features such as Call Announce Intercom, Paging, and On-Hook Dialing. The Enhanced model adds Full Speaker Phone capability and has 30 buttons for accessing lines and features. The Executive model incorporates Enhanced model functionality plus a 48 character interactive display. STARPLUS Key Telephones are as pleasing to the eye as they are functional. Each model comes in four designer colors: Burgundy, Black, Gray and Ash.

Founded in 1983, Vodavi has quietly emerged as one of the largest providers of business communication systems. With over 300,000 telephone systems and over 10 million residential and business telephones sold worldwide, Vodavi is a recognized leader in the design, manufacture and support of high-quality telephone systems.
