DX-80™

Big Features on a Small Business Budget

Introducing the DX-80, Comdial's all-in-one communications system that's affordable, easy to use, and loaded with great features – including integrated voice mail, live call screening, auto attendant, and more!

D X - 8 0

In today's fast-paced business environment, an efficient and responsive communications system isn't just a luxury — it's an essential tool that helps your business project a positive image, attract and keep customers, increase productivity, and raise the bottom line. With Comdial's DX-80, now even the smallest company can benefit from fully integrated, all-digital communications at an extremely affordable price.

Reliable Communications for Growing Businesses

Comdial's all-in-one DX-80 digital telephone system gets small businesses started with reliable, scalable communications technology. Fully expandable to 16 CO lines and 56 extensions*, the DX-80 lays the groundwork for future

business growth and expansion while providing investment protection every step of the way. With the DX-80, all of your system equipment and telephones are compatible, even to full expansion capacity.

Integrated Voice Mail for Around-the-Clock Messaging

The DX-80 features optional in-skin voice processing to give you greater control and flexibility with voice mail messaging. With a digital voice processing card installed directly inside the telephone system, the DX-80 provides fully integrated voice mail without requiring the dedication of any telephone system extension ports. That means all 56 extension ports are completely available for digital and analog port expansion needs.

The DX-80 Two-Line LCD Speakerphone

Every DX-80 telephone is a 40-button speakerphone with a two-line interactive LCD. We've even added a headset jack for hassle-free — and hands-free — operation!

Standard Interfaces

Optional Voice Mail Features

The DX-80 voice mail component offers additional integrated voice processing feature benefits because of its direct connection and access to the DX-80 telephone system architecture, including:

Auto Attendant: Ideal for off-peak or after-hours call handling, the auto attendant feature of the DX-80 ensures that all incoming calls are answered when live personnel are unavailable.

Live Call Screening: In addition to Name and Number Caller ID, the DX-80 provides live call screening, enabling you to pick up the telephone handset and listen as callers leave you voice mail messages.

Live Call Recording: Have you ever wanted to record a telephone conversation? Now you can. At the touch of a button, you can

easily record conversations and store them in your voice mail inbox for future reference.

Feature Rich, Attractive, and Easy to Use

The DX-80 digital telephone couldn't be simpler to program or easier to use. An interactive LCD shows the name and number of each caller, plus gives you step-by-step instructions on programming your telephone. Thirty dual-color status LEDs indicate Active Headset, Mute, DND, and other call modes, and Fixed Feature buttons provide one-touch access to calling options such as Call Forward, Call Park, and Voice Mail. Plus, the small footprint of the DX-80 telephone frees up valuable desktop work space while providing a host of easy-touch buttons and call feature options for increased efficiency and productivity.

DX-80 LCD Speakerphone

Every DX-80 telephone is a 40-button speakerphone with a two-line interactive LCD and a headset jack.

Busy Off-Hook Voice Announce with hands-free answer back

Music with two separate music channels

Call Forward routes internal & external calls differently

Easy Call Park includes personal, group, and guest

Interactive 2x16 LCD with Name/Number Caller ID standard

Dual-color status lamp indicates active headset, mute, and other call modes

30 programmable dual-color LED buttons for direct access to CO lines, extensions, speed dialing, and other features

One-touch manual or automatic record of conversations to voice mail

Memo Pad stores one-time speed-dial number while on a call

Adjustable 3-position telephone elevation stand

Headset Jack
