

# ATM PANEL TELEPHONE

SSP-351-D, SSP-351-X  
(Formerly SSP-310-D, SSP-310-X)

The CEECO Model SSP-351-D was designed to provide a compact flush mounted automatic dialing stainless steel panel telephone for areas subject to vandalism and abuse. Ideally suited for ATM telephone service, emergency service, or any "hot-line" application with limited space availability. The SSP-351-D constructed of rugged brushed stainless steel, secured with tamper proof security screws, with ATD-11 single number automatic tone dialer, armored cord handset, and chrome hookswitch and cradle assembly.
