OPEN THE LINES TO BETTER COMMUNICATIONS

Today, it's more important than ever to invest in technology that meets the demands of your business, without changing the way you do business. At Iwatsu, we design our solutions based on input from our customers to provide the performance and uncompromising quality necessary to meet the requirements of your daily business communications.

Iwatsu's third generation series of Omega-Phones delivers flexible functionality and enhanced call handling with new features, upgrade options, and a more streamlined design. Customizable to support small and medium businesses, the Omega-Phone product line is complete with a variety of versatile solutions designed for a wide range of communications needs:

- ▶▶▶ Omegatrek PS6 Portable Station
- ▶▶▶ IX-12KTD-3 Digital Display Key Telephone
- ▶▶▶ IX-12KTS-3 Digital Key Telephone
- ▶▶▶ IX-DCKT970 Digital Wireless Key Telephone
- ▶▶▶ IX-MKT Digital Key Telephone
- ▶▶▶ IX-DSS-3 Direct Station Selection Unit
- ▶▶▶ IX-ATT Attendant Console
- ▶▶▶ IX-12KTD-2 Digital Display Key Telephone

Just one example of the benefits Iwatsu Omega-Phones offer, the featured IX-12KTD-3 digital display telephone (opposite page) is equipped with a variety of productivity-enhancing features and upgrade options ranging from eight programmable feature keys with red LEDs and a Universal Mute key to an integrated headset connection, built-in full duplex speakerphone and a programmable key expansion module. Whether you consider the oversized two-line backlit LCD, 12 fully programmable multipurpose keys, or the incoming call indicator lamp, it's never been this easy to customize the ideal telephone for your specific business needs.

The built-in headset connection provides enhanced integration and convenient hands-free operation.

A red and green LED on each multipurpose key provides feature and line status indication for enhanced key functionality.

The Omega-Phone IX-12KTD-3 is equipped with a built-in full duplex DSP speakerphone* that provides hands-free operation on both internal and external calls.

The oversized dual-function indicator lamp allows you to monitor your phone status from a distance. A dual-color LED flashes red for incoming calls and green for programmable functions such as message waiting.

The backlit and field-upgradeable LCD displays oversized characters for easy-to-read information.

The Busy Bypass Text Messaging feature allows you to send a text message to the display of an Omega-Phone. There are up to 90 system and 10 personal text messages to choose from.

Instantly double the number of multi-purpose keys on your Omega-Phone with a snap-in 12-key expansion module (IX-2ELK-3).

Universal Mute key allows you to mute the voice transmission through the handset or microphone based on station status.

The recessed hold key decreases the likelihood of accidentally placing a call on hold.

Longer handset and base cords provide increased flexibility.

The Backspace Dialing feature eliminates the need to redial the entire telephone number when a dialing mistake is made.

The handset, speaker, and ringer volumes are individually controlled.

IX-12KTD-3 with 12-Key Expansion Unit

* The full-duplex hands-free function uses technologies developed by NTT.

Innovative station base design allows for a seven-position angle adjustment. It also serves as a wall mount unit.
