

Rack Seismic Gusset Kit

The Rack Seismic Gusset and Hardware Kit can be added to any CPI Universal Rack (46XXX series) to stiffen critical load bearing joints, reducing the need to stabilize the top of the rack.

- Adds additional support to critical rack joints
- Kit can be added to any CPI Universal Rack (46XXX series)

Kit consists of:

- (4) welded steel bolt-on gussets
- (8) 1/2-13 x 1-1/4" bolts
- (8) 1/2-13 nuts

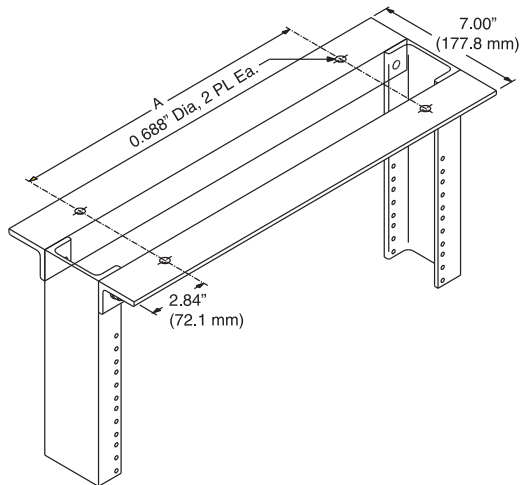

Part Number	Description	Shipping Weight lb (kg)
11592-X01	Gusset and Hardware Kit	10 (4.5)

X=color; 1=Gray, 2=White, 7=Black. Note: Seismic installation requirements should be approved by a licensed structural engineer.

Heavy-Duty Top Angle

Optional top angle for CPI Universal, Standard or 6"D (150 mm) Standard Racks.

- Material is aluminum extrusion, 1 1/2" x 2" x 1/4" (38.1 mm x 51 mm x 6.4 mm) with two 11/16" (17.46 mm) punched holes in top surface
- Recommended to be used in pairs with 10562-001 bracing
- Sold individually

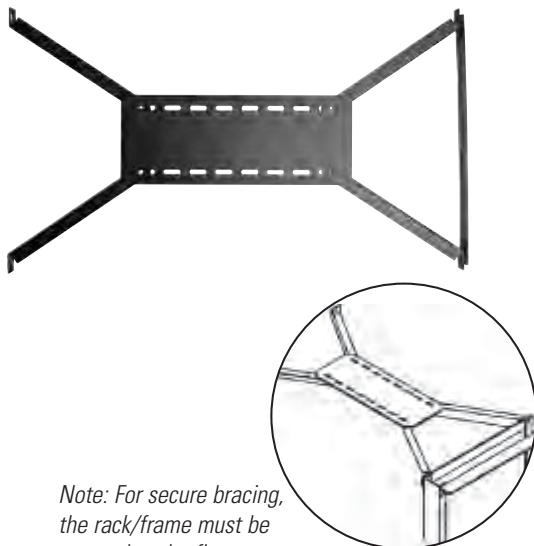

Part Number			
19" Rack	Dim. A	23" Rack	Dim. A
10473-X01	14.57 (370.1)	10473-X02	18.57 (471.7)

X=color; 1=Gray, 2=White, 5=Clear, 7=Black.

Adjustable Bracing Kit For Racks

This adjustable, strong, easy-to-install rack bracing kit provides a cost effective, attractive solution to bracing for equipment rack. Attaches directly to the wall.

- Adjustable 24" to 36"D (610 mm to 910 mm) from wall
- Made of strong lightweight aluminum
- Available in 19" and 23" widths
- Available in four colors to complement rack installations

Note: For secure bracing, the rack/frame must be secured to the floor.

Part Number	Description	Shipping Weight lb (kg)
12407-X19	19"W Kit	6 (2.7)
12407-X23	23"W Kit	7 (3.2)

X=color: 1=Gray, 2=White, 5=Clear, 7=Black
