GAI-TRONICS®
A Hubbell Company

GAI-Tronics Corporation offers a full line of Industrial Telephone Enclosures to protect telecommunications equipment in very harsh environments. These enclosures are ideally suited for outdoor use, for areas with harsh or corrosive chemicals, or any environment where protective housing is required.

The enclosures are constructed of durable glass-reinforced polyester, resistant to weather and corrosive chemicals. The hinged door provides a positive seal when the door is closed and securely latched. All models are available with an optional locking door or hasp lock hardware for added security.

The Model 255-001 Weatherproof Enclosure is equipped with a mounting plate to accommodate a standard wall telephone.

Material . . . . .Glass-reinforced polyester
NEMA Rating 4X
Mounting . . . . Four (4) 0.43 inch (11mm) diameter mounting holes
Weights . . . . 6.5 lbs. (2.94 kg)
Telephone Jack RJ11

Pole-Mounting Kits

MODELS 230-001, 231-001 and 232-001

Model 232-001

Model 230-001

GAI-Tronics Pole Mount brackets provide a suitable mounting surface for a variety of pole shapes. The universal bands are capable of securing the bracket to poles that are between 2.5 inches and 15 inches in diameter.

For additional support or for poles less than five inches in diameter, center mounting holes are provided for lag or machine bolts.

Model 231-001 and 232-001 utilize captive screw mounting holes to prevent unauthorized removal of equipment.

Model 231-001

All pole mount brackets are manufactured using 14-gauge cold-rolled steel with a gray polyurethane finish. The banding straps are 0.012 inch x 0.5 inch stainless steel.
