

Product Information Sheet

CABLE RUNWAY WALL TO RACK KIT

The CPI Cable Runway Wall To Rack Kit is a one part number solution to the problem of providing support for cable between the rack and the wall.

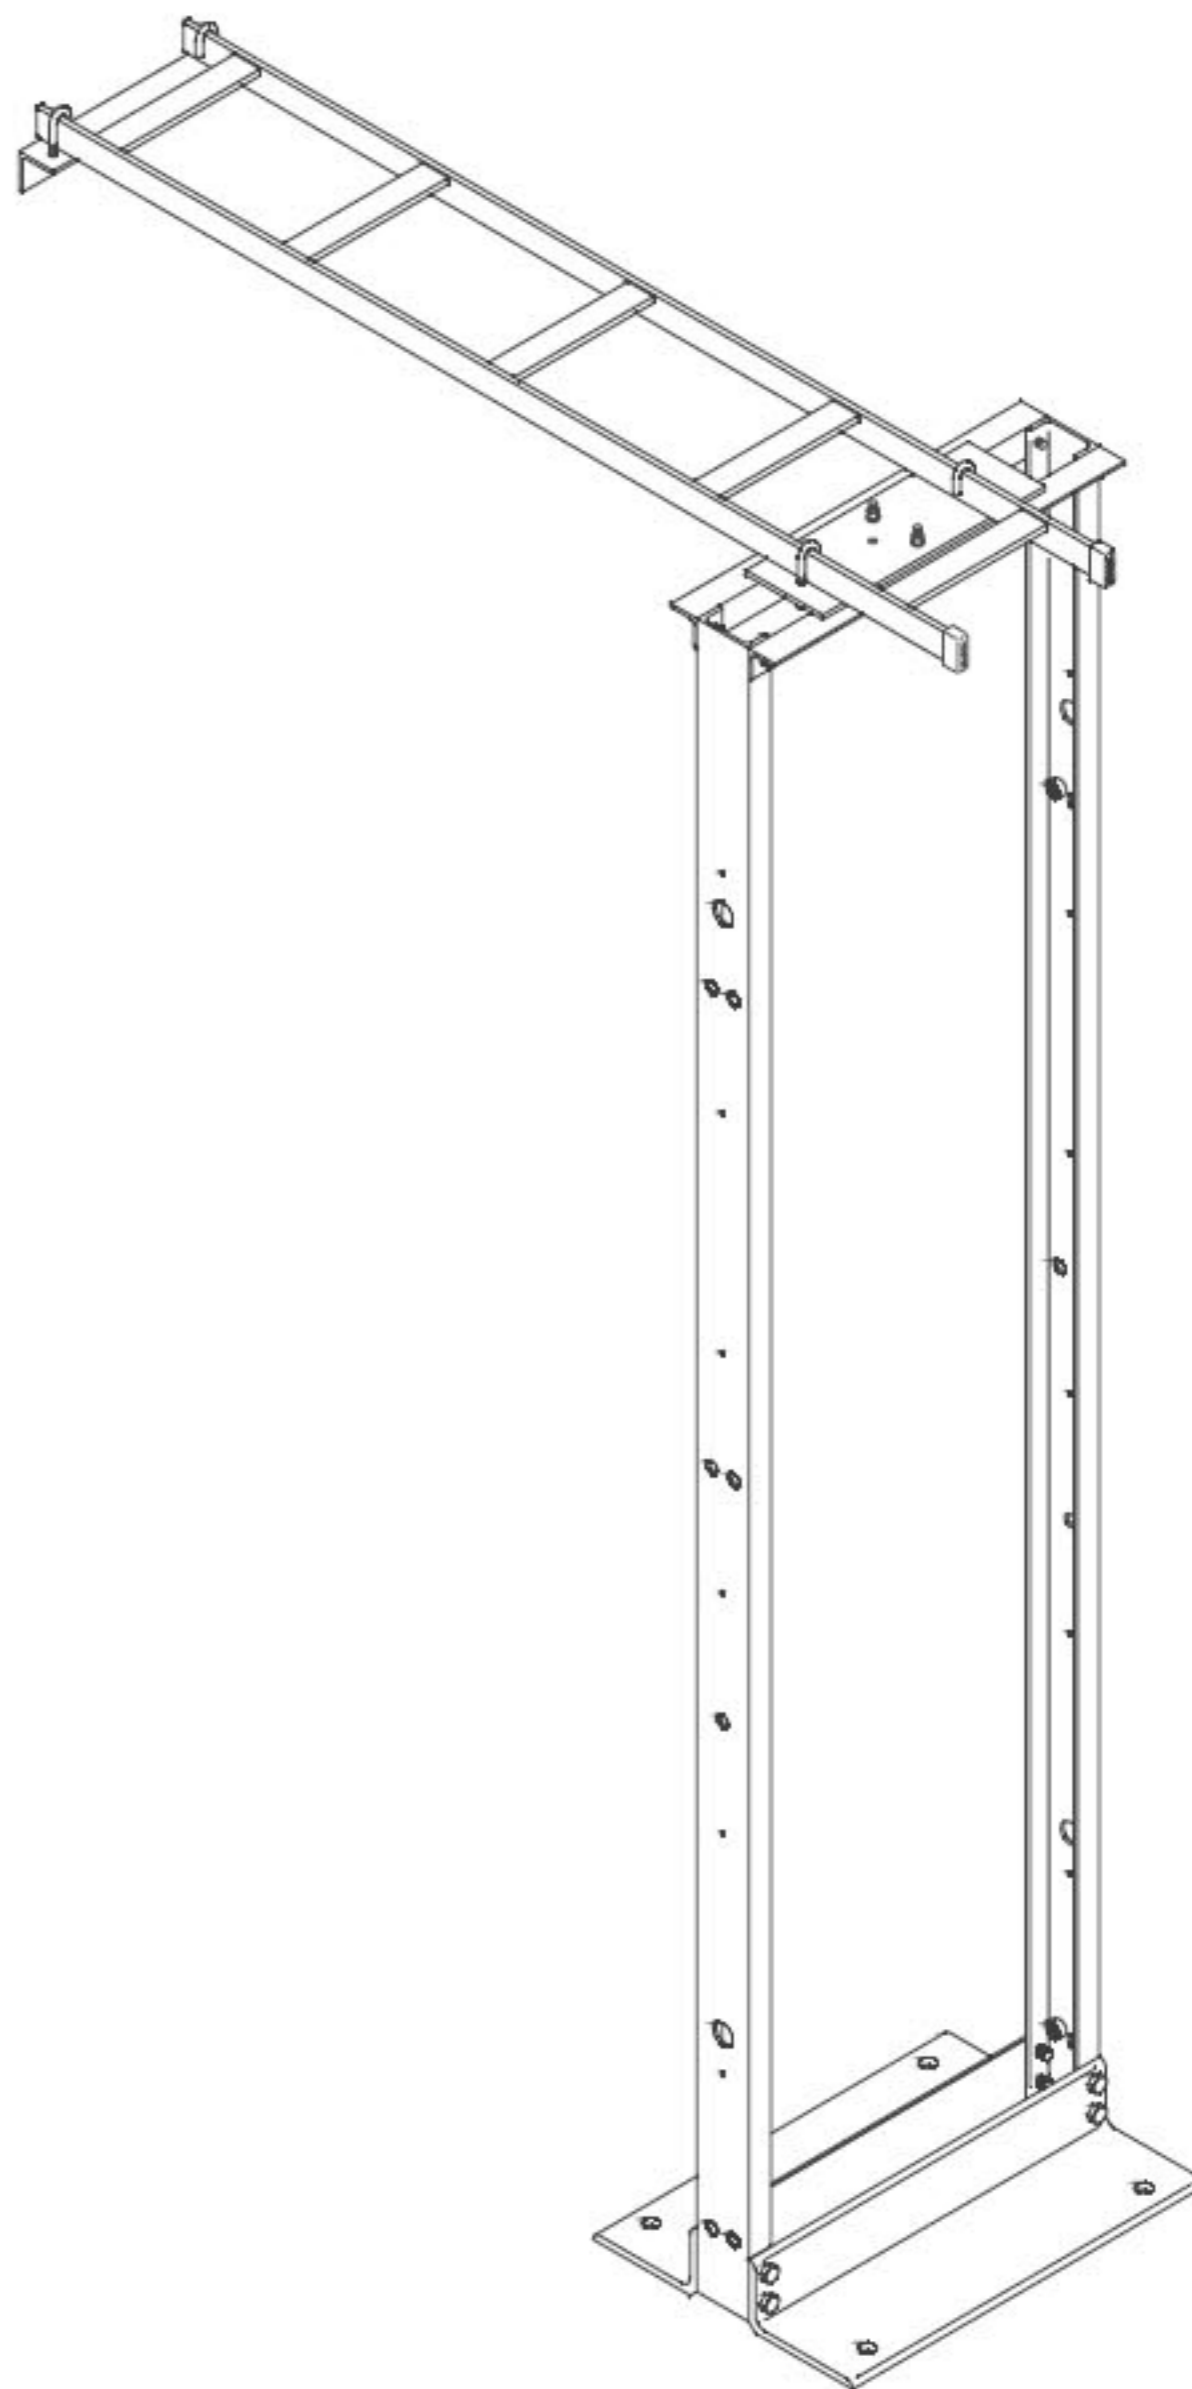

- Kit consists of 1 each:
 - 54" (4' 6") long universal cable runway
 - Wall angle support bracket
 - Rack to runway mounting plate
 - Pair of end caps
- Kit also includes six, zinc plated, gold chem film finished J-bolts

Use kit Part Number 11911 when attaching to a Standard and/or Universal series rack with a 3" deep mounting channel. Use kit number 31473 with the High Density Frame or the CatRack® with the 6" deep mounting channel.

Other components in the kit are finished with a powder coat paint in gray, white or black. The kit is available with runway that is 6', 9' or 12' wide. Rack is not included. Configure your requirements using the part number matrix below.

Part Number	Description	Shipping Weight
