

Revised Product Update

May 6, 2003

LC Upgrade Kit

Siemon's LC fiber upgrade kit has recently undergone a minor revision in conjunction with a change to our to fiber termination kit (P/N: FTERM-L2). The revised kit features the new company logo, improved torch and new LC microscope head for use with our enhanced 400X microscope.

NEW PRODUCT FEATURES

- Carry case with new company Logo
- The new - now black micro-torch (used for the shrink tube sleeves on jacketed style terminations) features a safety locking trigger to prevent accidental ignition.
- Durable LC polishing puck.
- The old LC adapter head is replaced by the new LC screw on style adapter head for use with the new high quality microscope. The microscope is included with the FTERM-L2 termination kit or available separately.
- Each of the components in the LC upgrade kit is also available separately (see optional ordering information below).

LC UPGRADE KIT
(for use with FTERM -L2)
