

# Revised Product Update

May 6, 2003

## Revised Lightspeed<sup>®</sup> Fiber Consumables Kit.

Siemon's Lightspeed fiber termination consumables kit (formerly P/N: FT-CKIT-L) has recently undergone a redesign in conjunction with a retooling of our Lightspeed fiber termination kit (p/n: FTERM-L2). The primary change to the consumables kit is the replacement of the old limited-use polishing films with our new reusable Lightspeed films. These films have gone through an extensive validation process and have been qualified to assure exceptional insertion & return loss results when used in accordance with our revised termination instructions and Lightspeed adhesive. The primary pad polish films have proven to produce superb repeatable results for a minimum of 70 connectors per sheet.

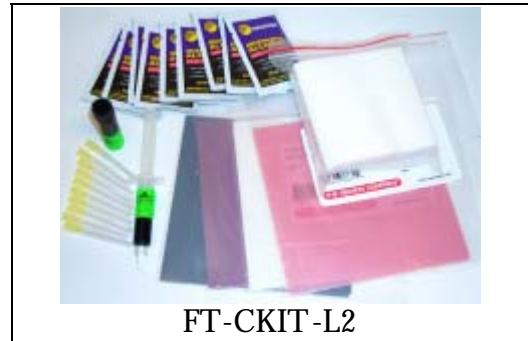

### NEW PRODUCT FEATURES

- The Lightspeed consumables kit includes; alcohol wipes, dry lint free wipes, required polishing films, primer bottle, syringe tips and syringe loaded with adhesive.
- All consumable items are also available as individual 'finished-good' items for ordering separately (see individual part numbers referenced below).
- Syringe tip needles now include caps for convenient storage.
- Reusable polishing films.
- Typical insertion loss (dB) = 0.05 (MM) & 0.12 (SM).
- Typical return loss (dB) = 33 (MM) & 55 (SM).

### ORDERING INFORMATION

FT-CKIT-L..... *Obsolete replaced by FT-CKIT-L2.*

FT-CKIT-L2.... *Consumables kit for use with fiber termination kit (P/N: FTERM-L2). Includes enough consumables to perform a minimum of 200 multimode or singlemode terminations.*

FT-CKIT-L2  
Consumables Kit

### Optional Ordering Information :
