

CS50 Wireless Office Headset System

Redefining the way you communicate

When you're on the phone, the information you need may not be in front of you. It may be in the next office, or down the hall. To keep up with business, you need to move; you need to stay in touch. You need the Plantronics CS50 wireless office headset system.

- The CS50 lets you take the conversation wherever you need to go—up to 300 feet from your office phone.
- Walk and talk for up to 8 hours on the phone without having to recharge. Fully recharged in less than 3 hours, 80% recharged in 1.5 hours.
- The CS50 uses digital 900MHz technology with a noise-canceling microphone to deliver calls that are crystal clear, private and completely secure.
- The CS50's integrated IntelliStand™ makes wireless mobility as easy as answering the phone—pick up the headset and you pick up the call. And when you're away from your desk, you're still in touch, either answering or ending a call with the touch of a button.*
- The CS50 is as stylish as it is comfortable with a customizable, convertible headset that can be worn over the ear or over the head, ensuring all-day wearing comfort. An optional behind-the-head style is also available.

Sound innovation for missions to the moon. And for everyday life on this planet, too.

In 1969, a Plantronics headset carried the historic first words from the moon: "That's one small step for man, one giant leap for mankind." Today, we're the headset of choice in mission-critical applications such as air traffic control and 911 dispatch. This history of proven sound innovation is the basis for every product we build—whether it's for work, for home or on the go.
