

# OnQ A-BUS AUDIO SYSTEM

## PRODUCT FACTS

- ▲ Advanced A-BUS™ technology delivers audio, IR, and source status signals over Category 5 cabling.
- ▲ A-BUS Source Input Unit accepts incoming audio signals, provides audio and source status signals, and receives IR commands.
- ▲ Expandable beyond four rooms by cascading additional 4 Zone Distribution Hubs.
- ▲ Volume controls feature integrated amplification for easier sound balancing and adjusting.
- ▲ A-BUS Local Source Input Unit allows user to plug in devices like portable audio players or computer audio outputs for in-room listening on local speakers.

**LED volume level indicators**

**Supports infrared remote control**

**Features auto volume turn on preset to prevent starting volume from being too loud.**

**Status light indicates whether source equipment is On or Off**

**A-BUS Volume Control Keypad**

**Accepts line-level audio signal input**

**Sends source status and audio signals, as well as receiving IR commands**

**Supports infrared remote control of stereo equipment**

### A-BUS Source Input Unit

NEW

Part Number

Accepts line-level signal input from a preamplifier which is typically the tape output from a receiver or second zone output of a multi-room receiver. Features four outputs for emitters so equipment can be controlled remotely via receiver or 12 VDC power supply. A-BUS technology sends source status and audio signals to the 4 Zone Distribution Hub and receives commands over CAT-5 cable. Includes A-BUS Status Power Supply. 2"H x 6.5"W.

364474-02

### A-BUS 4 Zone Distribution Hub

NEW

A central hub for up to 4 CAT-5 volume control cable connection. Easily expandable by cascading additional A-BUS Distribution Hubs to accommodate more than four volume controls. Includes A-BUS Power Supply 24V DC. 3"H x 6.5"W.

364475-02

### A-BUS Home Entertainment Connection Center

NEW

Designed for new and retrofit applications the Home Entertainment Connection Center features connections for CATV, digital satellite, and auxiliary video input, telecom connections for data and telephone, and speaker connections for home theater. Includes a rugged metal bracket which fits on standard 16" on-center studs and a white enamel cover to conceal all wire connections. Includes A-BUS Status Power Supply. 10"H x 9"W x 3.5"D.

364452-04

### A-BUS Amplified Volume Controls

NEW

Features advanced A-BUS technology with built-in amplification for superior sound distribution over Category 5 cabling allowing adjustable volume control in every room. Status light indicates whether source equipment is on/off. Volume control available with infrared. Fits with decorator-style face plates.

364473-03 (ivory)

### A-BUS Local Source Input Outlet

NEW

Allows user to plug in devices like portable audio players, master bedroom TVs, or computer audio outputs for in-room listening on local speakers. Automatically overrides the remote source music in the room when the local source is on and returns to source when local source is off or turns on the volume control if no music is currently playing.

### A-BUS Remote Control

NEW

Enables control of volume level and speaker on/off function with A-BUS Volume Control Keypads. 5"H x 1.75"W x 0.75"D.

364517-01

### A-BUS Single IR Emitter

NEW

Allows user to control source audio equipment by remote control from any room with A-BUS IR Volume Controls.

364494-01

### Replacement Products

#### A-BUS Status Power Supply, Source Input Unit

NEW

When plugged into the switched outlet of a receiver, it provides source on/off status to A-BUS components. Order for Source Input Unit (364474-01).

364488-01

#### A-BUS Power Supply 24 V DC

NEW

Plugs into 4 Zone Distribution Hub and provides system power. One power supply per hub is required. Order for 4 Zone Distribution Hub (364475-01).

364529-01
