

6287

Description

DHC Noise Block, 5 Amp, 120 Volt - White

Product Features

Device Type: Noise Block

Load: 5 Amp

Voltage: 120 Volt

Color: White

Standards and Certifications: UL

Warranty: 2-Year Limited

Color: White

Features and Benefits

- The 6287 is designed for use with DHC switch modules that include a means for connection to neutral. This device may be wired on the LOAD side of a DHC switch module or on the LINE side of any fixture using an electronic ballast, a low-voltage ballast, or any noise-generating source that does not require more than 5A 120 VAC. The 6287 prevents interference generated by fixture components from interfering with DHC signals.
- Small size for easier mounting at receiver or load device
- Used to block interference from appliances, electronic ballasts and home electronics in order to insure top performance from DHC systems
- Used to block signal leakage (attenuation) caused by capacitive filters and electronic power supplies
