

GALAXY BUILT-IN TELEPHONES

GB275V

The Galaxy Built-In Telephone offers users real convenience and efficiency. It is available in many models and color combinations. Ideal for family rooms, dens, kitchens and a variety of commercial applications such as motels, hospitals, schools, restaurants, etc. A hands free speakerphone is included in the line. Its features include Push-on and Push-off operation, fully powered from the telephone line,

and state-of-the-art switch-gain technology. The components used in the Galaxy are all industry standard.

The frontal dimensions of the Galaxy are 10 Wide by 12 High. It is arranged for flush mounting in new or existing 2 x 4 wall construction by use of an all purpose

Wall Can which measures 8 1/2 x 10 1/2 x 3 3/8. The wall can is not furnished with the Galaxy Telephone (except for Speakerphones which include the wall can) and must be ordered separately.

Choose from a wide selection of models listed below. Options other than those listed such as Armored Handset Cord, Message Waiting Light, Automatic Single Number Dialer are available on special order.

Galaxy Telephones are completely assembled instruments with matching Handset, Cord and Trim Frame. (See color key and ordering information.)
