

# NEW CATALOG ITEM

## FEATURES:

- Two-piece design reduces the product's shipping size and cost.
- Patented cable guide fingers at 1 RMU intervals provide an organized pathway for cable and patch cords.
- Snap-on, hinged door/cover hides cable for a finished appearance yet allows quick access to cable for making changes.
- Acorn nuts eliminate sharp edges, reducing injuries and torn cables.
- Carriage bolts ease installation by allowing tightening with just one hand.
- Choice of widths and depths lets you pick the best product for your cable management needs.
- Low-cost accessories allow you to create a double-sided unit for additional cable management in the rear.

## GLOBAL VERTICAL CABLING SECTION

### A Cost-Effective, Adaptable Accessory for Managing Your Cable

Chatsworth Products, Inc. (CPI) is pleased to announce the new Global Vertical Cabling Section, a cost-effective, adaptable vertical cable management solution. The unique, two-piece design of the 7' aluminum, one-sided section significantly reduces shipping size and cost to provide maximum value while retaining the high-quality workmanship common to all CPI products. The two parts can be quickly assembled and then bolted to CPI's Universal and Standard racks as well as QuadraRack™ frames.

The Global Vertical Cabling Section comes preassembled with patented cable guide fingers at 1 RMU intervals for you to easily and neatly organize cable. The fingers are made of durable, flame-retardant (UL 94V-0) plastic to withstand wear-and-tear and prevent accidental breakage. Choose between two sizes of cable guide fingers: standard 3.21" depth or extended 5.75" depth for more cable capacity, achieving a total depth of 6.76" and 9.30" respectively.

The product also includes an aluminum, snap-on, hinged door/cover to easily hide cable for a professional look. At the same time, it swings on hinges to open left or right, allowing quick access to the cable from either direction for easy moves, adds and changes. The door/cover sits on top of the cable guide fingers to provide additional room for organizing.

Improved CPI hardware makes the Global Vertical Cabling Section easier to install and maintain. CPI provides rounded acorn nuts for attaching the two section pieces together in order to eliminate sharp edges and reduce the chance of torn cables and injuries. For mounting the product to the rack, square carriage bolts - instead of standard round bolts - are provided, allowing tightening of the nuts with just one hand.

The Global Vertical Cabling Section includes a two-piece section, a door/cover and mounting hardware. Available in two widths (wide 6"W or narrow 3.65"W) and two depths (6.76"D with standard fingers or 9.30"D with extended fingers), so you can best accommodate your cable.

Should you require additional cable management capabilities, you can modify the product to fit your budget and needs. Create a double-sided unit by placing sections back-to-back, or add a low-cost set of seven cable management rings in the rear (see Accessories information on the back page of this sheet). Additional accessories, such as fiber management spools, will be made available in the near future.

For more information, please contact your authorized CPI Distributor or CPI Customer Service Representative, or go to [www.chatsworth.com](http://www.chatsworth.com)

## Accessories for the Global Vertical Cabling Section

*Purchase accessories for the Global Vertical Cabling Section to grow with or adapt to your changing needs.*

A set of seven **Cable Rings** can be attached to the back of the product to organize rear wires for a neat, professional installation. The rings provide the functionality of a double-sided cable management system – at considerable savings. (Bottom right illustration depicts wide cable rings.)

Double-Sided Cable Rings for Global Vertical Cabling Section		
Part Number	Description	Shipping Weight
12836-702	Wide Cable Rings, Set of 7, Black	5 lb
12836-701	Narrow Cable Rings, Set of 7, Black	4 lb

**Coming Soon:** A set of six **Fiber Management Spools**. Measuring 2" outside diameter, the spools provide additional cable support and proper bending radii for more efficient data transmission. Easily mounted at desired intervals to the front of the 6"-wide cabling section.
