

FreeSpeak gives you total mobility and freedom by eliminating wires between your mobile phone and the headset.

Introducing FreeSpeak™— cord-free comfort and hands-free convenience in a Bluetooth™ headset.

JABRA FreeSpeak is the ultimate hands-free and wire-free solution that connects your mobile phone to your headset via Bluetooth radio technology instead of a wire. FreeSpeak works up to 30 feet away from your mobile phone – talk freely even if your phone is inside a pocket or across the room. All calls are transmitted wirelessly to your earpiece. FreeSpeak gives you easy, intuitive access to volume controls, and features visible and audible status indicators.

Smart, stylish and lightweight.

Weighing less than an ounce, FreeSpeak is made of a soft, sound-absorbing elastomer material that reduces distortions, resulting in crisp sound quality. The earpiece and microphone boom fit behind either ear for a comfortable, secure fit. The earpiece also features the new JABRA MiniGel™, an evolution of our patented EarGel®. The soft, ergonomic gel tip channels sound directly into your ear for better reception. This improves your ability to hear conversations clearly, even in noisy environments.

Bluetooth
Mobile
Headset

Works with non-Bluetooth phones, too.

FreeSpeak also works with most non-Bluetooth mobile phones using a multi-adapter, a versatile

Bluetooth adapter that also functions as a charger and holder. The multi-adapter plugs directly into your non-Bluetooth phone to enable Bluetooth wireless connectivity. JABRA provides versions of the multi-adapter for use with Nokia phones, phones with a 2.5mm jack (connection varies with phone model), and many Pocket PC phones and Smartphones.*

JABRA Ergonomic™ design:

- Convenient—No wires. Easy to put on and take off. Works in either ear.
- Comfortable—Contours to your ear for a custom fit.
- Stylish—Metallic exterior finish. Discreet, unobtrusive design.
- Simple—Easy set-up for cordless communication with most Bluetooth or non-Bluetooth phones.
- Lightweight—Enjoy all-day comfort. Weighs less than an ounce (0.8 oz/23g).
- Secure Fit—Ear-hugging design stays in place as you move.

Features:

- LED in-use indicator lets others know you're on the line.
- One-size-fits-all JABRA MiniGel™ channels sound for superior clarity and reception. Pivots for use in either ear.
- Uni-directional microphone emphasizes your voice over background noise.
- Multi-function on/off button supports voice-activated dialing and answer/end commands (varies with phone model).
- Lithium polymer battery is rechargeable and long-lasting.
- Volume control provides easy, one-touch access.
- Louder speaker volume due to its active battery-powered amplifier, especially useful in noisy environments.
- Secure voice transmission provided by Bluetooth's advanced communication protocols.

Charging cradle
for use with most
Bluetooth phones
(charger/holder)

Multi-adapter
for use with most
non-Bluetooth
phones (all-in-one
charger/holder/
Bluetooth adapter)

Both feature a snap-on clip to hold the headset to your belt or purse when not in use.

First came hands-free. Now comes cord-free.

The cordless connection for your mobile phone. FreeSpeak.

Available Package Options

Description/Product Number

Package Contents

Headset for Most Bluetooth Phones*

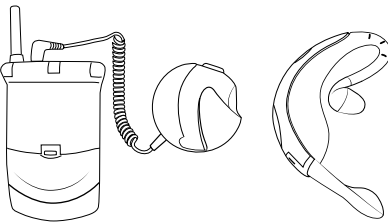

100-9100000-02

- JABRA FreeSpeak headset
- Charging cradle (charger/holder) with belt clip
- AC power adapter (115 VAC, 60Hz)
- 3 one-size-fits-all MiniGels
- Illustrated User Guide in 3 languages: English, Spanish, French
- Quick Start Guide

Headset and Adapter for Most Non-Bluetooth Phones*

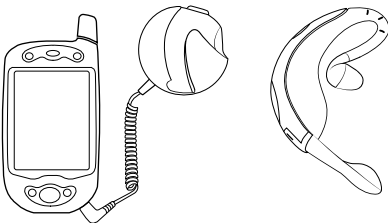

100-91030000-02

- JABRA FreeSpeak headset
- Multi-adapter with 2.5mm, 3-conductor audio plug (charger/holder/Bluetooth adapter with belt clip)
- AC power adapter (115 VAC, 60Hz)

Typical Talk Time: Bluetooth phone version: 3 hours (depends on phone model and usage)
Non-Bluetooth phone version: 4 hours

Typical Standby Time: 100 hours

Typical Charging Time: 2 hours

Battery Type: Rechargeable lithium polymer

Maximum Bluetooth Radio Frequency Power: 0.0025 watts (1% or less of a typical mobile phone's radio frequency power)

Case Size: 6 product units (12.625 in. × 11.375 in. × 10.125 in.)

Connection when used with non-Bluetooth mobile phone: Various plug/socket adapters depending on phone model

About Bluetooth

Bluetooth is a radio technology developed to deliver short-range wireless mobility. Bluetooth technology eliminates wires between devices, such as mobile phones and headsets, and enables communication between devices that are in close proximity to one another. Bluetooth facilitates fast, secure transmissions of both voice and data.
