IMPACT SCS

## The Comdial Solution ... Business Telephones at a Price Your Company Can Afford

Now you can have the productivity benefits of next generation telecommunications solutions at an affordable price with Comdial's Impact SCS™ telephones. Comdial's Impact SCS telephones provide easy access to Comdial's advanced communications systems. A host of user-friendly advanced features, including a large-screen interactive display phone and the convenience of hands-free communications, deliver the caliber of communications that you need to be successful in today's competitive market.

### Now You Can Select the Right Telephone for each Employee

Every call you receive can be a potential client or sale, so it's important that each call is handled quickly and professionally. So, do you need a single-line telephone, 24-button full-duplex speakerphone, or Comdial's new *iPrimo* SCS™ IP telephone. The Impact SCS family offers all these and more, providing varied solutions to meet your business needs of today and tomorrow. Each person in your organization can have a

telephone customized, making all of your communications more effective and efficient. The Impact SCS family of telephones offers six feature-rich models to choose from, plus an attendant console for expanded capabilities.

### Setting Up Your Telephone Couldn't Be Easier

Several Impact SCS models take advantage of alphanumeric Liquid Crystal Display (LCD) technology to make programming your telephone as easy as pushing a button. On the LCD models, set-up is easy and quick with prompts that guide you through the process every step of the way, eliminating the need for long — and potentially costly — training. All people in your organization will have advanced communications at their fingertips to improve their productivity and responsiveness.

### Communications for Today and Tomorrow

Comdial's new *iPrimo* SCS™ phone integrates smoothly with your existing equipment, letting you continue to use your Impact SCS phones right alongside your new advanced IP phone. With Comdial's *iPrimo* SCS phone, you simply plug into your company's Local Area Network or Wide Area Network for

instant access to the IP network. Employees can use their high-speed Internet connection to access the corporate network from anywhere, whether traveling, telecommuting from home, or visiting a branch office. So when your company is ready to move to the next generation of unified communications with an IP telephone .... Comdial is ready for you!

### Advanced Features Help You Improve Productivity and Responsiveness in Every Department

**Advanced Dialing Options:** For busy organizations, the advanced dialing options of the Impact SCS family of telephones increases productivity by providing one-touch access to co-workers or contacts. Features such as Speed Dial, Last Number Redial, and access to additional auto dial locations facilitate call handling.

**Hands-Free Communication:** Comdial equips several models of the Impact SCS models with combination headset/handset

jacks for hands-free communication. The full-duplex, fully integrated speakerphone option enables hassle-free talk time and group listening and participation.

**Call Status at a Glance:** The feature buttons on the Impact SCS telephones allow for one-touch call transfer, call conference, mute, hold, and speakerphone activation, plus much more, depending on the model you choose. Flashing LED indicators alert you to new voice mail messages and show you, at a glance, the status of all calls.

**User-Friendly Voice Mail:** The Impact SCS provides increased flexibility when handling voice mail messages. Easy-touch buttons let you record voice mail messages or screen your incoming calls for mid-message pickup, plus so much more.

**Comdial's advanced features at an affordable price ... that's the Comdial Solution to help your Company.**
