

NEW CATALOG ITEM

FEATURES:

- Choose from a complete line of horizontal power strips that offer a variety of features in a streamlined and attractive black steel housing.
- Power strips are shipped preassembled with bracket to fit most mounting requirements.
- Circuit breaker and LED indicators (for power and surge protection) are located on the front of the power strip for maximum visibility.
- Twist lock plugs provide added connection security.
- 15 and 20 Amp power strips are UL Listed 60950.
- 30 Amp power strip is UL Recognized.

HORIZONTAL POWER STRIP UPGRADE

Professional network installations require quality products capable of providing continuous and reliable performance. Power supply products are an important contributor to a successful operation. Chatsworth Products, Inc., in its continuing program to provide complete solutions of the highest quality, introduces a line of all-new power strips.

CPI's new line of power strips provide all of the necessary features customers demand, housed in a streamlined, durable steel body. All horizontal power strips are 17" long and are fitted with brackets that allow the power strips to be flush or stand-off mounted to racks or cabinets with a 19", 23" or 25" rack mount width. Flush-mount power strips require only 1 RMU of space.

Features include 15 or 20 ampere rating (at 125 VAC), eight outlets, surge or non-surge protected, a circuit breaker and a standard or twist lock plug. The flush-mount power strip is also offered with 30 ampere rating and 12 outlets. All power strips are black with a 10' cord. (Power switches have been removed to prevent accidental power loss.)

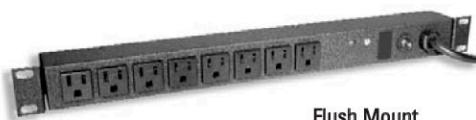

Power strip solutions have also been provided for the Cube-iT PLUS® Wall-Mount Cabinet and other wall-mount enclosures. A vertical mount 17" power strip for universal racks is also available.

For more information, please contact your authorized CPI Distributor or CPI Customer Service Representative or go to www.chatsworth.com

Power Strip - Flush Rack Mount
