- › Perforated metal doors have 63% open area for greater ventilation.
- › Easy-to-remove locking side panels now available for MegaFrame and SlimFrame Cabinets.
- › Top panels are vented and accommodate optional fan kits for maximum ventilation.

CABINET SERVICE PARTS

Complete Listing For MegaFrame, SlimFrame and SteelFrame Cabinets

Chatsworth Products, Inc. (CPI) now offers a complete line of service parts for M-Series MegaFrame, C-Series SlimFrame and T-Series SteelFrame Cabinets. Order doors, side panels or top panels to replace items that have been damaged, to add to frame-only configurations or to meet the changing environment of your data center.

Replacement doors are available in several styles including solid or vented plexiglass and solid or high-flow perforated metal. The high-flow perforated metal door has a 63% open area for maximum ventilation. Doors are easy to remove and can be mounted to open from the left or right. Keyed locks are preinstalled and include two keys.

Side panels for MegaFrame and SlimFrame Cabinets are offered in two styles; the new easy-to-remove locking side panel and the bolt-on side panel. The easy-to-remove side panel allows quick access to equipment in a fully loaded cabinet. The SteelFrame side panel is also locking and easy to remove. Side panels ship with two keys per panel.

Top panels are vented with edge-protected cable pass through ports. (A solid top panel is available for the MegaFrame Cabinet.) Optional fan kits can be mounted to top panels to provide additional ventilation.

Most service parts are available in gray, white or black. MegaFrame and SlimFrame service parts are constructed of high-strength aluminum. Door frames are silver anodized aluminum. SteelFrame service parts are painted, cold rolled steel.

When ordering a service part, ensure it matches the cabinet's dimensions. Call Technical Support for additional assistance or to order parts not listed.
