2801

A cost-effective solution that meets basic single line telephone needs. This model features a data port, message wait lamp, flash button, redial button, adjustable handset volume button and off/high/low ringer adjustment.

The ideal choice for satisfying today's business requirement for one and two line telephones is Vodavi's **STARPLUS** 2800 Series Telephones. Technically advanced with a stylish compact design, one of the three **STARPLUS** 2800 Series models is sure to fit your business application. Whether you are a hotel, resort, business office, university, government agency, etc., you will quickly recognize the added convenience provided by this cost-effective solution.

All the Features You Need

All three 2800 models are FCC registered, and both hearing aid and American Disability Act (ADA) compliant. Standard features include a handset volume button, data jack, message waiting light, redial button, flash button and ringer control.

A right side data port connects to the telephone line for modem or fax machine use.

Highly visible red message wait lamp.

The 2802 and 2803 models offer the flexibility to program 10 buttons for one-touch access.
