

Model 8009

Featured Business Set

The 8009 helps you work smarter, not harder, without costing a small fortune.

Key Features:

- Six programmable memory keys— for access to features* or frequently called numbers
- Voltage Message Waiting indicator— shows when a Voice Mail message is waiting*
- LINK key—makes it easy to transfer a call or activate a special feature
- Line Release key
- Last-number redial
- Hold key
- Compatible with Centrex, PBX, or standard telephone service

The 8009 gives you simple one-touch access to a variety of convenient communication features. Use the six programmable memory keys to store frequently used numbers—customers, suppliers, family members, and others. Or, you can store the code for features like Call Forwarding or Call Return.

Customize your phone by programming the combination of features and numbers that best fits your needs. Either way, you'll reach the service or person you need with a single keystroke.

An indicator light makes the 8009 especially easy to use. If you have Voice Mail services from your telephone company, the indicator light lets you know when messages are waiting*. The same indicator flashes to remind you when a call is on hold or when your phone is ringing—something you'll appreciate in a hectic or noisy office.

Worried about accidentally disconnecting an important customer when transferring a call or activating a special feature? Just use the LINK key on the 8009 and you won't make a mistake. You can use the Hold key to place a caller on hold, and pick up from any extension. And, if you're tired of repeatedly trying to reach a busy number, make your life easier by using the Redial key.

Whether you're part of a professional firm, a small business, or operating an office at home, the affordable 8009 has the features and flexibility to help you stay competitive.
