

ENJOY TV TOGETHER

TV EARS does not affect the normal operation of your television.

PARTNER'S HEADSET

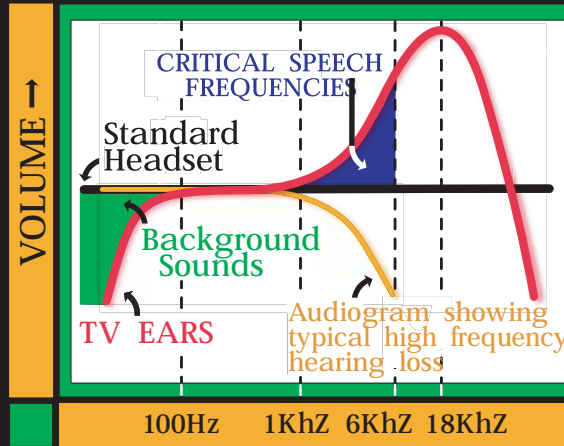

Purchase an optional second headset for your partner, so they can share the TV EARS experience.

There is no limit to the number of headsets you can use at the same time with the TV EARS system.

- Each person can adjust their individual head set to the desired volume and tone levels.
- Includes everything you need to hook-up to any TV in the world.
- TV EARS eliminates loud TV & clarifies words.
- Never have to share the same headset.
- Great gift idea. Everyone loves TV EARS!

The TV EARS transmitter charges two headsets at the same time. Second headset not included.

HEAR WHAT YOU'VE BEEN MISSING

The TV Ears Power Curve automatically increases the volume of the speech frequencies while also decreasing the bass tones and background noise. This unique combination allows the words and dialogue to be crystal clear and never overpowered by music or sound effects.

TAKE TV EARS TO THE MOVIES!

TV EARS will work at 1,000's of:

- Movie Theaters
- Play Houses
- Places of Worship
- Museums
- Lecture Halls
- Courtrooms
- and More!

There are sounds and words you are missing. So make your next outing more fun and bring TV EARS with you. You will enjoy rich sound and hear everything as if you are standing right next to the speaker!

How Does it Work

Many public places have attached a larger version of the TV EARS transmitter to their audio systems so that TV EARS will work in their facility. Just bring your TV EARS headset and turn it on.

The Federal ADA law of 1992 requires most public facilities to install a wide area transmitter.

TV EARS does not guarantee that its products will work in all public places. Contact each individual facility to verify system compatibility with TV EARS.

Sold by:

Quality

We are a company that takes pride in quality craftsmanship & superior customer service, since 1997. We hope you enjoy TV EARS.

Lightweight and comfortable.

- Easy to Install.
- Headset is Wireless.

YOU WON'T BELIEVE IT UNTIL YOU HEAR IT!

Need to Hear Better?

The TV EARS+ model has the extra power for people with hearing loss, mild, moderate or severe. With TV EARS+ you will hear every word clearly and never disturb others again. Thousands of people have said,

"TV EARS Has Changed my Life."

Comfortable and Light

At only 1.6 oz., including battery, the TV EARS headset, with its soft cushion eartips is so comfortable and light, you will forget you have it on. The design is perfect for reclining in your favorite chair or lying in bed.

Volume, Tone, L-R Balance Controls

Each person's hearing is as unique as a fingerprint and that is why the TV EARS headset has independent, adjustable volume, tone and balance dials, which allow the user to customize the audio to match his/her hearing requirements.

Batteries Included

(AVC) Automatic Volume Control

The AVC circuit automatically reduces annoying bursts in volume during commercials or channel surfing.

Installing TV EARS

If your TV has "Audio Out Ports" on the back of the TV then simply use the universal audio cord that comes with your TV EARS. Plug the TV EARS transmitter into the back of your TV. It's Simple... No "Audio Outs"? Use the Multi-Use Power Microphone to install your TV EARS.

(TAP) Television Audio Processing

Wireless TAP technology is unique to TV EARS. The circuit in the transmitter automatically amplifies hard to hear words and lowers the volume of background sounds such as music, thereby, making television dialogue easy to hear and understand.

Multi-Use Power Microphone

Use it on a television that does not have an "Audio Out Port".

The amazing Power Mic will pick up any sound and send it to the headset.

- Use your imagination, the Power Mic will pick up any sound. Simply velcro the power microphone to anything that makes sound.
- The Power Mic is also perfect for quick installation on Televisions when traveling to hotels or staying with friends or family.
