

ON-Q HOME ENTERTAINMENT CONNECTION CENTERS (HECC)

PRODUCT OVERVIEW

- Features connections for CATV, digital satellite, and auxiliary video input; and telecom connections for data and telephone.
- Speaker connections for 5.1, 6.1 and 7.1 home theater systems.
- Connections for front, side, rear, and center speakers and sub woofers.
- Three versions handle A-BUS, 6-room audio, and basic applications, including new or retrofit for each.
- Rugged metal pre-wire bracket mounts on standard 16" on-center studs.
- Features an installer side and a user side that require no tools.
- Provides four openings for On-Q Home AnyPort Outlet inserts for custom applications.
- White, ready-to-use cover (that can also be painted to fit any décor) allows wires to pass through while concealing all unsightly connections.

TIPS AND TECHNOLOGY: HECC

When installing the HECC, remember these important tips:

- Leave enough wire to allow the HECC to be worked on outside of the wall, at least 24".
- Bundle the wires and tape them into a plastic bag during rough-in; this will protect them during the rest of the construction process.
- Tag your wires during the rough to save time and frustration during the trim phase.
