JB Color Hands-free Video Entry Security System

Crisp color image for day or night with LED illuminators and 3.5 inches TFT color LCD monitor. Door call-in turns on the image instantly with audio monitoring. Simply touching TALK button opens up the hands-free communication. Initiating an all-call the inside stations by a touch of CALL button. Called party can answer and talk individually by touching TALK button. All communication is automatic voice activated hands-free or manual Talk-Listen operation. MONITOR button enables to monitor either door station with both visual and audio. An optional relay adaptor can activate electric door strike for the communicating entrance selectively when two door stations and door strikes are installed.

**3.5" TFT color LCD monitor
with handsfree communication**
