

## Why use a headset?

**Free your hands.** The most obvious benefit of a headset is that it frees you from holding the telephone handset. And lets you put both hands to work, comfortably.

**Get more done.** A headset makes you more productive, letting you write, type, page through files, etc. with both hands while you're on the phone.

**Save your neck.** You'll be more comfortable with a headset—no more propping the telephone between your head and shoulder.

## Why choose the GN 5150?

Trying to decide which GN Netcom headset to buy? The GN 5150 gives you professional performance, with features like these:

**Corded headset system.** If you usually work at your desk, or close to it, a corded headset should work for you.

**Over-the-head style.** The GN 5150 has a click-stop adjustable headband that stays comfortably and securely in place.

**Sound in one ear (monaural).** Ideal if you like to be aware of what's going on around you during phone calls.

**Sleek microphone boom.** The GN 5150's elegantly styled boom is the perfect choice for the professional user.

# GN 5150

## The headset system professionals use.

The GN 5150 was designed for people who need a high-performance headset system. One with the very latest technology. Top-of-the-line features and functions. And a sleek, elegant—and durable—style. If you're looking for a headset that meets the highest professional standards, you just found it: the GN 5150.

### Serious business.

Everything about the GN 5150 means business. It works with most any corded telephone, including multi-line PBXs. The microphone boom is precision engineered for clear, natural sound quality. The whole headset weighs only one ounce, so it's easy

to wear. Yet it's built to last. And comfortable, too, thanks to its leatherette ear cushion. Not a detail was missed—even the headband is ingeniously crafted to lock in the perfect fit.

The GN 5150 amplifier is every bit as advanced as the headset. Innovative circuitry eliminates background noise and guards against sudden sound spikes. And all the controls you need are right at your fingertips: a sliding volume control, headset/handset selector and a mute button.

### All pro, no cons.

The GN 5150 is the ultimate professional productivity tool. But you don't need to be a professional to set it up. Or to use it. The technology behind the GN 5150 is sophisticated. Enjoying the clarity, comfort and hands-free convenience it gives you is simple.
