AVAYON Technologies Announces DivX Certified DVD Player *DXP-1000 From American-based Company is Feature Rich, Yet Value Priced*

Nashua, New Hampshire – November 16, 2004 – AVAYON Technologies has announced the DXP1000 DVD player has passed full certification from DivXNetworks, Inc., the company that created the revolutionary, patent-pending DivX(R) video compression technology. Before certifying the DXP-1000, the DivXNetworks expert team of video engineers subjected the device to a rigorous testing process to ensure high performance and interoperability with all versions of DivX video. The DXP-1000 is AVAYON's initial entry into the DivX player segment of the consumer electronics industry.

The DivX Certified DXP-1000 from AVAYON is a robust DVD player that offers a rich list of features and is compatible with a wide range of formats, all at a very reasonable price. The list of formats includes DVD-R, DVD-RW, DVD+R, DVD+RW, Xvid, MPEG-4, WMA, and many more. Being an Official DivX Certified™ product it also supports DivX® 5, DivX® 4, DivX® 3, and DivX® VOD video content (in compliance with DivX Certified™ technical requirements), and also offers full 5.1 surround sound support. The dual microphone Karaoke feature makes the DXP-1000 especially attractive in certain global markets.

"AVAYON saw an opportunity in the burgeoning DivX hardware market. Worldwide users currently number more than 140 million and that number is growing," said Jeff Babington, President and CEO of AVAYON. "But it has been difficult for DivX users to find high quality players that offered the full range of features, yet carried a reasonable price tag. The DXP-1000 is designed to appeal to this new mass market, and our challenge to meet product demand has proven the point." Babington adds, "We already have future products in the design stage, and expect to nail down release schedules soon."

Built with the ESS 6698 chip, the DXP-1000 has been designed and manufactured with quality and ease of use in mind. The Progressive Scan feature doubles the vertical resolution of the image, resulting in a noticeably sharper video image which makes it ideal for today's home theater entertainment center. All AVAYON Technologies products are Officially DivX Certified™, and are rigorously tested by DivXNetworks, the creators of DivX® video technology as capable of playing all versions of DivX® video content. AVAYON offers customers unlimited online and telephone support.

"The Avayon DXP1000 is a full-featured, value-priced DVD Player that meets the rigorous quality, security and interoperability requirements for full DivX Certification," said Bill Holmes, Director of Product Management, Consumer Electronics at DivXNetworks, Inc. "The global market for DivX Certified products is expanding at an incredibly rapid rate, and retailers all over the world are having difficulty keeping products in stock due to high consumer demand. The Avayon DXP1000 is a welcome addition to the market that offers real value to DivX users."

About DivXNetworks: DivXNetworks is a consumer-focused video technology company positioned at the center of multimedia convergence. The company's core offering is the DivX® video codec, among the world's most popular video compression technologies with over 120 million users worldwide. Often called "the MP3 of video," the patent-pending DivX video technology offers DVD-quality at 10 times greater compression than MPEG-2 files, enabling full length films to easily fit on a CD or be delivered over broadband connections. DivX video technology powers a range of applications that span the convergence value chain, from a secure IP-based video-on-demand solution to next-generation consumer electronics products and video software applications. DivXNetworks is headquartered in San Diego, California, with satellite offices in Los Angeles and San Jose, CA, Taipei, Taiwan, Tokyo, Japan, Guildford, England and Dortmund, Germany.
