Alternate Space Cable Runway

Designed specifically for use over 19" wide racks (CPI Series 55053, 46353 or 66353) and any 6"W (150 mm) vertical cable manager.

A single 104.75"L (2660.7 mm) space will transition a row of four 19" Racks (CPI Series 55053, 46353 or 66353) and five 6"W (150 mm) Vertical Cabling Sections (CPI Series 11729, as shown lower left).

- Runway cross-members are spaced to simplify horizontal to vertical alignment of Cross Member Radius Drops
- Eliminates additional hardware, time-consuming field fabrication, and complicated adjustments required with traditional products

Cable Runway Pathway Dividers

Pathway Dividers divide Cable Runway into multiple cable pathways in order to organize cables according to media type or destination. By organizing horizontal cables by destination according to route or zone, technicians can better manage cables when additional cables are added or when the cable path through the building changes due to building renovations.

- Cable spools separate cables into individual pathways for better organization of cables
- Spools have a smooth surface to protect cable jackets from damage during installation or maintenance
- Easy installation with included hardware
- Universal/Trough Style Dividers fit 3/8"H x 1-1/2"W (9.53 mm x 38.1 mm) cross members on CPI Universal or Trough Cable Runway
- TELCO/UL Classified Style Dividers fit 1/2"H x 1"W (13 mm x 30 mm) cross members on CPI TELCO or UL Classified Cable Runway
