

FREEDM[®] LST[™] Gel-Free Cables

A LANscape[®] Pretium[™] Solutions Product

Corning
Cable Systems

Applications

- Inter- and intrabuilding backbones in aerial, duct and riser applications

Description

Corning Cable Systems FREEDM[®] LST[™] Gel-Free Cables are flame-retardant, indoor/outdoor, riser-rated cables suitable for installation in aerial, duct and riser applications. Because of the riser rating, there is no need for a transition splice when entering the building. Using water-swallowable yarns both inside and surrounding the buffer tubes, these cables are fully water-blocked without the use of messy gels, providing for more efficient and craft-friendly cable preparation. Available in a compact design from 2 to 24 fibers, the buffer tubes and fibers in each tube are color-coded for quick, easy identification.

Features / Benefits

- Gel-free design is fully waterblocked using craft-friendly, water-swallowable yarns, making cable access and use of buffer tube fan-out kits simple
- Available in 62.5 μm , 50 μm , single-mode and hybrid versions
- Standard 3 mm buffer tube size reduces the number of access tools required by craftspersons
- Flame-retardant jacket is rugged, durable and easy to strip
- Compact design, all-dielectric cable construction requires no grounding or bonding
- Color-coded fibers and buffer tubes for quick and easy identification during installation
- No preferential bend axis for easier installation and better handling
- UV-resistant and listed OFNR and FT-4
- Compatible with buffer tube fan-out kit for rapid, simple termination
- Available with interlocking armor
- Available with Gigabit Ethernet and 10 Gigabit Ethernet performance

Specifications

Temperatures	Storage: -40° to +70°C (-40° to +158°F) Installation: -10° to +60°C (+14° to +140°F) Operation: -40° to +70°C (-40° to +158°F)
Approvals and Listings	National Electrical Code [®] (NEC [®]) OFNR, CSA OFN FT-4
Common Installations	Outdoor aerial and duct; indoor vertical riser and general purpose horizontal according to NEC Article 770
Design and Test Criteria	ANSI/ICEA S-104-696

Corning Cable Systems recommends storing indoor/outdoor cable in a proper temperature environment prior to installation to allow the cable temperature to meet installation temperature range specifications for best installation results.
