

VXI blueparrott

B200 Wireless Office Headset

*Be hands-free and wire-free
at the office.*

Professional Grade
Communication Technology

Be hands-free and wire-free. Simply connect the VXI BlueParrott B200 to your office telephone to increase productivity and comfort while in your office. Never again be tethered to your telephone or try to hold a telephone between your neck and shoulder! There are no wires to accidentally pull out, or catch on objects... no need to stay in one place to hear and talk clearly. Works with most digital, PBX, key systems and multi-line business telephones.

The industry's only professional-grade Bluetooth headset. High-quality components ensure great sound on both ends of the call. Unlike many of the over-the-ear styled Bluetooth headsets, the B200's over-the-head styling ensures that the headset will stay comfortably on your head. It's so comfortable-you'll forget you're wearing a headset.

Set up is simple. The B200 simply plugs into to the handset or headset port of your office phone. There are no compatibility switches to set.

Bluetooth has many advantages. BlueParrott's wireless technology powered by Bluetooth ensures crystal clear communications up to 75 feet from the base. Also works with Bluetooth technology enabled cell phones and computers. Install up to 127 BlueParrott B200's in your office with no worries about security or interference issues.

Sold by:
