- Cable management accessories
- Rack-mount power strips
- Rack shelves

### EasySwing Wall-Mount Rack

Available in three heights and four depths

### Easy Installation

Ships flat and partially-assembled  
Simply unfold, secure corners, install

EasySwing™ Wall-Mount Racks are a family of open wall-mounted 19" EIA swing gate racks available in three heights and four depths. EasySwing Wall-Mount Racks are copper and fiber ready, are easy to install, and provide easy access to the front and rear of equipment. Use EasySwing Wall-Mount Racks to store network, communications and security equipment in telecommunication and equipment rooms or in other rooms where floor space is limited.

EasySwing Wall-Mount Rack ships flat and partially assembled. Assembly is easy — unfold the rack and install one assembly bolt per corner. The frame is punched with keyhole mounting slots located on 18.5" centers. Attach the rack to the wall with 1/4" installation hardware (order separately) EasySwing can swing open to the right or left, simply flip the rack over before securing it to the wall.

EasySwing Wall-Mount Rack supports 19" EIA rack-mount equipment and single-sided shelves. Equipment mounts on a hinged gate. The gate has single-sided rack-mount rails with roll-formed #12-24 threads for attaching equipment. The gate swings open to provide easy access to the rear of equipment during service work. The gate is secured in the closed position with a removable pin that latches through the wall-mount frame.

EasySwing Wall-Mount Rack will support 85 pounds of equipment. Premise cables are guided from the wall to the swing gate with included reusable cable management straps. The straps attach to slots in the frame and support cables as the gate opens and closes. Add other CPI accessories to customize your installation.

See reverse for product selection. Contact CPI for configuration assistance.
