

Cable Management Rack Assembly

INSTALLATION INSTRUCTIONS

ICC's Cable Management Racks are designed to be lightweight, sturdy, and easy to install. These high quality, black powder coated aluminum racks will support most EIA 19" rack mountable network devices and hardware such as servers, switches, PBX systems, and other equipment.

1. Place the Vertical Cable Management Rails on a flat surface with the open channels facing inward.
2. Place the top support across the top end of the Vertical Cable Management Rails. Install eight 3/8-16 x 3/8" bolts, nuts and washers as illustrated. **DON'T TIGHTEN!**
3. Place one base angle across the bottom end of the Vertical Cable Management Rails. Install four 3/8 16 x 5/8" bolts, nuts and washers as illustrated. **DON'T TIGHTEN!**
4. Turn the assembly over and repeat step 3 for the other side.
5. Stand the assembly up to check for squareness. Make sure the base angle is level and will rest flat on a flat surface.
6. Tighten the bolts and torque to approx. 25-30lb-ft.
7. Place one Cable Management Trough in the front of the top support. Install four 12-24 x 5/8" mounting screws as illustrated.
8. Repeat step 7 for the other side.
9. Anchor the Cable Management Rack Assembly to the flooring utilizing the four holes on the base angle.

Legend:

- A** Cable Management Trough
- B** 3/8-16 x 5/8" Bolts
- C** 3/8" washers
- D** Top Support
- E** 12-24 x 5/8" Mounting Screws

Features and Benefits

1. 45 RMS accomodates varying panel configurations.
2. Self aligning design.
3. Rugged steel and high strength aluminum construction.
4. Includes 12-24 rack screws
5. Durable black powder coated finish
6. RMU markings
