TYPICAL SPECIFICATION

The 4-Ring Horizontal Patch Cord Manager shall provide the capability to organize and contain patch cords on the front of the panel. The front of the panel shall provide four (4) horizontal distribution rings to reduce stress on stored cables to retain optimal cable geometry. All distribution rings shall have edges with a radius to protect against nicks and tears. Patch cord managers shall be 1 or 2 EIA rack units high, and fit standard 19" racks. The material shall be .060" steel with black powder coat finish.
