

Enhanced Cable Managers

Enhanced Vertical Managers allow cables to be organized by rack-mount unit, making it easier to trace individual cables during moves, adds and changes. Additionally, two Enhanced Vertical Managers can be connected with Front-to-Back Managers (as shown) to create a complete pathway for cables that connect network switches and computers within the same or adjacent cabinets.

Enhanced Vertical Managers are available in two sizes for large and extra-large cable capacities. The narrow version can be added to any MegaFrame Cabinet. The wide version is used in any 23"W MegaFrame Cabinet that has been converted into a 19" rack solution with CPI's 23"-19" Rail Adapter Kit (P/N 10587, page 2-83). Both models include a lockable, snap-on door to protect cables. The matching Front-to-Back Managers (sold in pairs) snap onto the vertical managers and adjust to match the depth of the cable managers.

- Cable openings in Enhanced Vertical Manager allow cables to exit by rack-mount unit; openings have rounded edges to protect cable and will not deform or break
- The back side of the Enhanced Vertical Manager has four edge-protected cable pass-through ports for front-to-back cabling
- Cover snaps on and opens to the right or left
- Front-to-Back Managers adjust in depth to connect the front and rear Enhanced Vertical Manager
- Constructed of high-strength lightweight aluminum

Narrow Enhanced Vertical Cable Manager
