## VERTICAL CABLE MANAGER NOW INCLUDED WITH C-SERIES SLIMFRAME CABINET

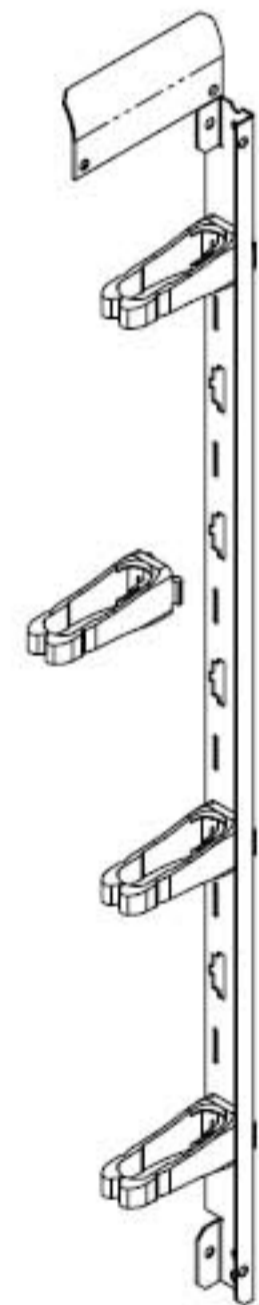

We listened to our customers. Now included with every C-Series SlimFrame Cabinet System is a pre-installed vertical cable manager.

Previously offered as an accessory, this unique, space-saving solution features two vertical mounting brackets, eight detachable cable rings, and one control radius that eases cable out of the top of the cabinet.

The SlimFrame Vertical Cable Manager will continue to be offered as a separate part number (P/N Series 11809) for retrofitting existing SlimFrame Cabinets. Additional cable management rings (P/N 11817-001) can be ordered to complement your vertical cable manager.

With the C-Series SlimFrame Series Cabinets, quality cable management for 24" wide cabinets is not an option – it's included. Rely on Chatsworth Products for the solutions you need for quality applications.
