SpeedStar®

Category 6 110-Cross Connect System

Suttle's SpeedStar 110-Cross Connect System provides a high performance Cat 6 solution for data communications management in a telecommunications closet, main distribution frame, or consolidation point. 110-Cross Connects are ideal for use where space is limited or a cost-effective solution is preferred over a modular patch panel. Angled IDC connector pins aid in maintaining maximum Category 6 performance, providing a gas tight connection and improved cable retention.

Features and Benefits

• Exceeds Category 6 TIA/EIA-568-B.2 specifications for component performance.*

Angled and paired IDC pins aid in maintaining maximum Cat 6 performance and provide a gas tight connection and improved cable retention

Wiring Block design permits neat, organized wiring behind the block

*Available Q1 2003.
