

# Mighty Mo® 4-Mation Server Rack

The Mighty Mo 4-Mation Server Management Rack will support almost any server available today. Ortronics has given the old "four post" rack a new dimension with the addition of patent pending adjustable equipment mounting rails. The rails can be adjusted after the rack is completely installed! No other manufacturer offers this type of flexibility. Mighty Mo 4-Mation can be assembled as a 19" or 23" W rack without additional hardware.

The Mighty Mo 4-Mation's base angles are reversible. This allows them to be mounted facing out for a wider stance if the rack is to be free standing, or either of the bottom angles can be turned inward to keep the foot-print within a 2 foot square.

- Universal Mighty Mo side assembly holes allow multiple rack line-ups with any of our Mighty Mo racks
- Can be assembled as a 19" or 23" rack. No additional hardware required; no need to stock two sizes of racks
- Speednuts included with every Mighty Mo 4-Mation and increase the speed and ease of assembly

## Mighty Mo 4-Mation Server Rack

The Mighty Mo 4-Mation accepts all three styles of Mighty Mo 3 cable managers. The mounting rails adjust from 6" to 32", independent of the structural members. This makes it possible to mount "half height" rails on the frame, enabling equipment with different depth requirements to be mounted on one rack. Color is black.

Construction: Aluminum Frame with Steel EIA Rails

Assembly required.

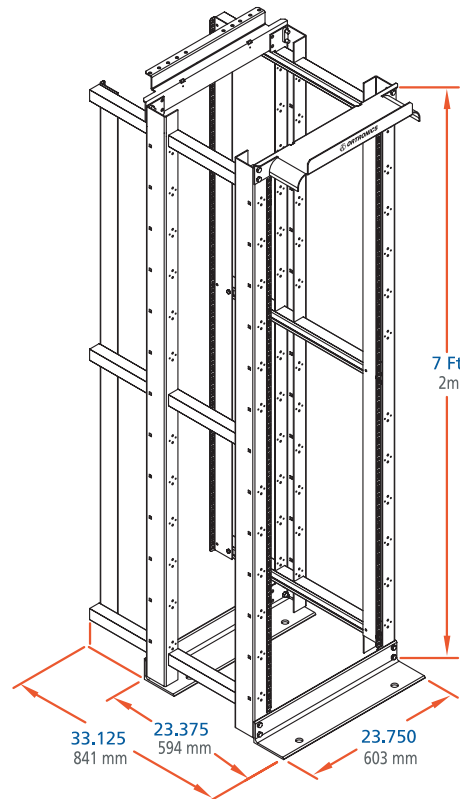

*Patent Pending*

PART NO.	DESCRIPTION
<b>OR-60400224</b>	Four-post aluminum frame with steel EIA rails, supplied with 50 #12-24 cage nuts and screws, 44 rack units, 7' H

**MIGHTY MO SPEEDNUTS**  
Included with every Mighty Mo 4-Mation

## Adjustable EIA Half Height Rail Kit

These rails mount on the Mighty Mo 4-Mation and adjust so that equipment of different depths can be mounted on the same rack. Clear finish.
