Designed to perform. Built to last.

Imagine the perfect contact center headsets. They'd sound great. Be comfortable enough to wear all day. And durable enough to not wear out. While you're at it, make them the most affordable headsets in their class. You've just imagined the GN 2000 Series:

- True wideband sound (150-6800 Hz) meets VoIP standards.
- Two boom/microphone styles: flex boom with noise-canceling microphone and the industry's first flexible SoundTube with a standard microphone.
- Extra-thick, pivoting ear cushions keep you comfortable and focused.
- PeakStop™ technology protects against sudden, loud sound spikes.
- Rugged good looks that will last and last.

GN 2015 ST Binaural*

The GN 2000 Series delivers in every category. Let's start with sound quality. The GN 2000 Series' true wideband sound lets you hear every detail, the first time. In fact, with frequency response from 150 Hz to 6800 Hz, the GN 2000 Series commercial headsets are the only headsets to meet VoIP standards. Their extra-thick, pivoting ear cushions conform comfortably to your ears—helping to block out unwanted noise while channeling sound directly into your ear.

Two microphone/boom combinations are available, both designed to minimize room noise and maximize communication. The flex boom is paired with a noise-canceling microphone to reduce background noise. The GN 2000 ST features a standard microphone, together with the industry's first flexible SoundTube—which lets you precisely position the boom for optimal voice pickup.

But the GN 2000 Series doesn't only sound great. It protects you against loud sound spikes with PeakStop™ technology, which cuts off sudden loud noises above 118 dB SPL—well before you'll ever experience any discomfort.

Of course, none of this means much if the headset can't take the day-to-day rigors of contact center life. So the GN 2000 Series headsets are the most durable contact center models we've ever built—with features like all metal boom pivots and impact-resistant headbands.

Wideband sound quality. All-day comfort. Day-after-day durability. And unprecedented affordability. It all adds up to the all-around best buy in contact center headsets. The GN 2000 Series.
