

# DV4 & DV2000 Messaging from DuVoice

Be Efficient

Save Money

Solve Problems

Collaborate

Let Unified Messaging from DuVoice change the way you do business.

The once separate worlds of voicemail, E-mail, and FAX have now merged into one. DuVoice makes a family of products that help to combine these media into a single Unified Messaging solution. DV4 provides a cost-effective solution for even the smallest organizations while DV2000 serves the needs of very large enterprise users.

Since 1990 DuVoice has provided voice messaging and automated attendant systems for a wide variety of applications, integrated with a number of telephone systems. Over the past 15 years, DuVoice has worked with switch manufacturers 'from Avaya to Vodavi' to provide specific solutions to customer needs.

Unified Messaging has been used for years, by the largest businesses in the United States. Now, DuVoice makes Unified Messaging available and cost effective for even the smallest business.

Today, *any* organization can become more efficient, improve internal and external communication, foster collaboration and save money thanks to Unified Messaging from DuVoice Corporation.

Flexible voice mail and automated attendant features mean that you can tailor your DuVoice system to meet your precise needs.

DuVoice systems integrate with nearly any telephone switch available today. This means that the investment you make today can be used in the future—even if you replace your existing telephone system.

DuVoice Solutions scale from small office applications up to thousands of users.

The technical support and professional services provided by DuVoice are among the best in the industry.

DuVoice provides comprehensive installation support for resellers, helping insure that every system is installed correctly and functions as advertised. All DuVoice products include extensive remote access capabilities to facilitate factory support.

DuVoice professional services can be deployed to assist with system design, programming, or even on site installation and training.
