

QUIET-COOL COMPONENT COOLER

Removes Heat Right at the Source

COMPONENT COOLER removes heat right at the source. Position the Component Cooler on the top vents of cable and satellite boxes and other equipment that produces large amounts of heat.

Optimized for components on open shelving.

FEATURES

- Extends equipment life: cools satellite/cable boxes, receivers and other hot-running equipment
- Removes heat from top vents of component
- Optimized for components on open shelving
- Available as set of three to cool an entire system

ADVANCED DESIGN

- Quiet fan performs at 19 dB
- Low profile design fits between stacked components
- Fan activates automatically at 90°F, turns off at 88°F

Product	Description	Noise Level @ 1meter away	Air Flow	Power
COMP-COOL	Single fan, low-profile component cooler	19 dB	8 CFM	7.5VDC @ 70mA
COMP-COOL-3	Daisy-chained, low-profile component coolers, set of 3	24 dB	8 CFM (per fan)	7.5VDC @ 210mA
COMP-COOL-E	Additional component cooler, connects to COMP-COOL-3	19 dB	8 CFM	7.5VDC @ 70mA
