# Fiber Optic Enclosures

Wall Mount

The Wall Mount Fiber Cabinet features dual hinged doors providing complete front access. Top and bottom cable entries for ease of installation and future additions. Units can be ganged for additional port applications. Cable entry points use a flexible material to minimize contamination from foreign matter. The Wall Mount Fiber Cabinet comes with mounting hardware, internal cable management and labels for accurate cable administration. The snap-in panels allow for quick and easy installation, removal and expansion. All wall cabinets come with door lock & keys.

Rack Mount

Rack Mount Fiber Cabinet enclosures efficiently connect, protect and manage up to 36 fibers. They are designed to accomodate the same snap-in panels used in our wall cabinets. All Rack Mount Fiber Cabinets feature a sliding tray allowing easy access to connections from the front or rear. Multiple access openings allow for flexible installation options. Includes mounting brackets and internal cable management for accurate cable administration. A sliding top cover allows full access to cabinet.
