

NEW

EZ-Path[®] MAX

FIRE RATED PATHWAY

Cabling Super Highway

EZ-Path[®] MAX feeding multiple Standard EZ-Path[®] pathways.

MAX grid system accommodates up to 5 pathways.

New Interlocking design for easy gang installation.

EZ-Path[®] MAX, Standard and Mini

Manages TWICE as Many Cables as Our Standard EZ-Path[®]

The EZ-Path[®] MAX fire rated pathway* is a raceway device designed to allow an increased loading capacity for cables that penetrate fire-rated walls.

It features a built-in fire and smoke sealing system that automatically adjusts to the amount of cables installed. Once installed in a fire barrier, cables can be easily added or removed at any time without the need to remove or reinstall firestopping materials.

- Has more than twice the cable capacity of Standard EZ-Path[®] 33.
- The solution for large cables including telephone, power, and optical fiber raceway.
- The original "no hassle", fire and smoke compliant, "fill it till it's full" pathway that saves money with every cable change.
