

**NEW**

# **EZ-Path<sup>®</sup> MAX**

**FIRE RATED PATHWAY**

## **Cabling Super Highway**

*EZ-Path<sup>®</sup> MAX feeding multiple Standard EZ-Path<sup>®</sup> pathways.*

*MAX grid system accommodates up to 5 pathways.*

*New Interlocking design for easy gang installation.*

*EZ-Path<sup>®</sup> MAX, Standard and Mini*

### **Manages TWICE as Many Cables as Our Standard EZ-Path<sup>®</sup>**

The EZ-Path<sup>®</sup> MAX fire rated pathway\* is a raceway device designed to allow an increased loading capacity for cables that penetrate fire-rated walls.

It features a built-in fire and smoke sealing system that automatically adjusts to the amount of cables installed. Once installed in a fire barrier, cables can be easily added or removed at any time without the need to remove or reinstall firestopping materials.

- Has more than twice the cable capacity of Standard EZ-Path<sup>®</sup> 33.
- The solution for large cables including telephone, power, and optical fiber raceway.
- The original "no hassle", fire and smoke compliant, "fill it till it's full" pathway that saves money with every cable change.
