# SpecSeal FIRESTOP PRODUCTS ®

Ready Sleeve™
Ready to install out-of-the-box firestop sleeve kit

Seals off the path of fire, smoke and superheated gasses while providing support and protection for electrical, telephone, and data cables.

Kit includes a 12 in. (300 mm) long steel sleeve available in 1, 2, or 4 in. (25, 51, or 102 mm) diameter; corresponding sized steel escutcheon plates which lock the device in place; and SpecSeal® Firestop Putty to seal the ends of the sleeve to the required 1 in. (25 mm) depth. Each sleeve end is rounded smooth to protect cable jacketing without the need for bushings. (Bushing is supplied with 1" sleeve)

- **Economical** – Significant material and labor savings vs. field fabrication.

- **Ready to Install** – No additional parts or fabrication required. Conveniently sized for up to 10" (250 mm) thick barriers.

- **No External Firestop Seal Required** – Factory supplied intumescent firestop gasket eliminates the need to seal the circumference of the steel sleeve at its egress from each side of barrier.

- **UL® Classified and Code Compliant** – Each kit designed to provide up to a 2 hour F Rating in accordance with UL® System requirements. Assures code compliance every time!

- **For Rated and Non-Rated Barriers** – Putty seal impedes the passage of fire, smoke, superheated gases, and particulate dust, and minimizes noise transmission.
