HUBBELL

Sold by:

Hubbell introduces a new fire-rated poke-through fitting that accommodates various communication cable capacity levels. The new single service fire-rated poke-through incorporates a two inch conduit that is designed to support up to 36 low voltage cables in one location. These two inch single service units are UL Listed for floors with a 1-2 hour

fire rating. In addition, colors of existing single and multi-service flush furniture feed fire-rated poke-throughs have been expanded to provide consistency throughout the product offering. Service fittings are available in gray, black, and brass finishes. These existing units are UL Listed for floors with a 1-4 hour fire rating.

Features

- Two inch conduit through floor fitting.
- Combination service fitting knockout.
- 1-2 hour fire rating.
- Internal spurs for securing into cored hole.
- All brass appearance available.

Benefits

- Supports up to 36 low voltage cables in one location.
- Accepts either 2" or 1 1/4" flexible conduit connectors.
- Superior fire barrier provides enhanced protection in a 3" cored hole.
- Installs easily from above the floor while preventing fitting from pulling out of cored hole.
- Attractive economical alternative to solid brass.
