

Which boom arm is right for you?

The GN 9120 offers you a choice of microphone boom arms. Choosing the boom is mainly about personal preference, but also depends on whether you're in a quiet or noisy office environment.

Midi boom

Unobtrusive and compact.

- Great in private or quiet office environments.
- Noise-filtering microphone with excellent sound transmission.

Micro boom

Discreet and sleek.

- Great for typical open office environments.
- Standard microphone with excellent sound transmission.

Flex boom

Flexible and personal.

- Great for open, loud office environments.
- Noise-cancelling microphone with excellent noise reduction.

Which wearing style suits you?

The GN 9120 comes with both the headband and the earhook wearing styles. And, you can change wearing styles as often as you wish! Naturally, both wearing styles are yours, no matter which boom you choose.

Headband

- The discreet, over-the-head wearing solution.

Earhook

- The light and comfortable on-the-ear wearing style.
