

AMPLIFIED & SPECIAL HANDSETS

*GBG6B AMPLIFIED RECEIVER HANDSET

This Amplified Handset provides improved telephone reception for subscribers with impaired hearing. They may also be used by persons with normal hearing who require additional receiver volume due to high ambient noise conditions.

The handset contains a built-in solid state amplifier and has a volume control in the center of the handle.

*GBG6M AMPLIFIED RECEIVER HANDSET WITH MODULAR CORD

The GBG6M Amplified Handset is the same as the GBG6B except equipped for Modular Cord; cord not furnished unless specified.

*GBK6, *GBK6M AMPLIFIED RECEIVER HANDSETS

The GBK6 and GBK6M Amplified Handsets are the same as the GBG68 and the GBG6M except that they use the K-type molded handle instead of the original G-type. The K" units are useful on contemporary telephone instruments.

All models e/w (HAC) Hearing

Models marked with an asterisk () can be e/w the GB117 Noise Cancelling Transmitter (ADD-NCT to part number) or the GB116 Electret-type Transmitter (ADD-ET to part number).

CORDS AND PLUG OPTIONS

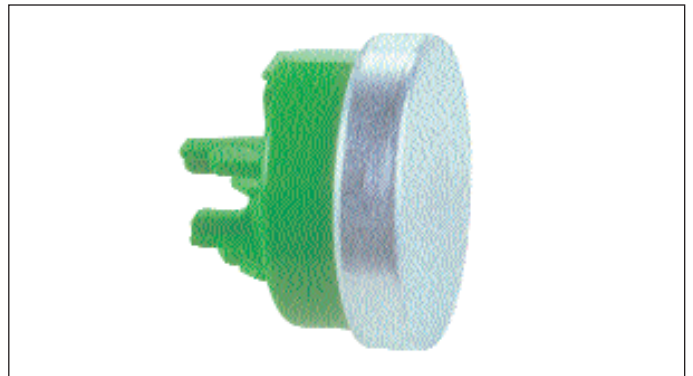

Cords

56 cords are furnished with non-modular units. Other cord lengths can be furnished on all models. After basic part number, add **-12** for 12-foot cord or **-25** for 25-foot cord.

Plugs

4-conductor plugs, such as AT327, and 3-conductor plugs, such as AT310, can be furnished with all models.

NOTE: All handsets can be equipped with a variety of plugs. Please see pages 26 and 27.

GB116

Electret transmitter replaces carbon unit for better clarity of transmission. To include an electret transmitter, add **-ET** to any handset part number.

GB117

Noise Cancelling Transmitter Module. Replaces carbon unit under standard cap on handset. To include a Noise Cancelling Transmitter, add **-NCT** to any handset part number.

Receiver units on all models are hearing aid compatible.
