ARCHITECTURAL/ENGINEERING SPECIFICATIONS

For standard outdoor applications the camera shall be housed in an FDW75 enclosure, which is available in either wall or pendant mounted versions. Blowers and thermostatically controlled heaters shall be included. Outdoor units shall be a 24Vac input. The housing top shall be manufactured from high-impact engineered plastic, UV protected, with a UL flame rating of 94V0. The dome shall be made of optically clear injection molded polycarbonate, and shall be held in place with 3 captive fasteners. Both clear and tinted domes shall be available. A safety cable shall be provided to hold the dome while servicing. For outdoor models that support network cameras the input voltage is 24vac and the housing shall include 24vac to 12vdc power supply for the camera. For the JVC VN-C655U the output power to the camera is 18vdc.
