

Encore®

Telephone Headset Family

Top-of-the-line headsets with premium sound quality

Over-the-head style provides optimum comfort and durability

The Plantronics® Encore headset delivers the very best in sound quality, comfort and reliability for call center and office professionals.

Encore sets the standard in premium sound quality with our unique Sound Enhancement System (SES®). A tone control switch lets you select the level of bass and treble that you prefer for a full, rich sound.

We paid equal attention to fit and all-day wearing comfort. Encore features super-soft ear cushions, and a "click-stop" adjustment system on the headband and turret that provides exactly the right fit and consistent positioning of the microphone.

We also understand that durability and reliability are of critical importance, and we've built Encore to last.

Backed by a two-year warranty, Encore delivers unsurpassed durability all day, every day.

HEADSET AMPLIFIER REQUIRED

AMP UP!

Plantronics offers amplifiers to connect our headsets to your telephones, including cordless models for office mobility.

Direct-connect Polaris™ headsets are available for headset-ready phones and agent consoles.

World Leadership: Plantronics is a world leader in lightweight communications headsets with over 40 years of experience. We offer a complete line of headsets for call center, office, home, mobile and computer applications, all backed by a service and support team that is second to none.

The Plantronics voice tube advantage: Plantronics invented the voice tube and continues to improve the design to deliver the best in performance and style. Our voice tubes are the only ones that slide back and forth for better positioning and

improved sound quality. You can also add color to your conversations with AttiTube™ color voice tubes.

Reliability for business-critical applications: Plantronics has years of experience developing headsets for mission-critical applications, including 911 centers, the FAA and even the headset that carried Neil Armstrong's first words from the moon. That same attention to durability and reliability goes into the headsets we design for your business-critical applications.
