

Superior sound and comfort Wireless IP telephony

The Jabra GN9330e USB* wireless headset makes your PC-based IP telephony conversations sound better. High definition, wideband IP audio ensures you hear – and are heard – with superb clarity.

- Up to 325 feet of wireless office freedom
- WiFi-friendly 1.9 GHz frequency with DECT 6.0 wireless technology
- Revolutionary wideband sound quality for IP telephony
- Up to 6 hours talk time without recharging
- Noise-canceling microphone for reduced background noise
- Digital encryption for secure conversations
- Stylish and lightweight, at less than 1 oz
- Exceptional ease of setup and use

Talking has never sounded this good. The Jabra GN9330e USB is the first wireless office headset to offer true wideband audio. Its 6.8 kHz audio bandwidth is more than twice that of conventional telephony. Not only does our high-definition sound give you the feeling of a true “face-to-face” conversation, it also helps increase your productivity because you hear every detail the first time.

Enhanced Noise-canceling microphone technology together with refined wind noise reduction ensures your voice is always transmitted clearly, no matter where you are in the office. And conversation security is guaranteed as well. Thanks to digital encryption, rest assured that the person you’re talking to is the only one listening.

Headsets have never been so easy to setup and use. The Jabra GN9330e USB headset connects quickly and effortlessly to your computer. With an enhanced design, improved materials and weighing less than an ounce, the GN9330e USB is so comfortable you’ll forget you are even wearing it.

With a range of up to 325 feet, you can take calls throughout your office. And with 6 hours of talk time (around-the-clock talk time with optional, hot-swappable interchangeable battery) you can conduct your day’s business without recharging. The Jabra GN9330e USB allows you to escape the limitations set by your conventional telephone handset, providing hands-free convenience, all-day comfort, and superb sound clarity.

Jabra GN9330e USB

* Also available in a version optimized for Microsoft Office Communicator 2007.

Feature	Benefit
Truly wireless headset	The wireless Jabra GN9330e USB gives you true hands-free mobility and increased efficiency. No cables involved.
Up to 325 feet office operating range	Get maximum value from the office space. Move hands-free and unhindered throughout the working day. You no longer need to be beside your computer to conduct business over IP.
Full 6 hour talk time	The Jabra GN9330e USB comes with a single 6-hour battery. A second, hot-swappable battery is available as an accessory. Switch batteries and never drop a call!
3 hour battery recharging time	You know your headset will always be ready for the next day's business.
Battery status indicator	The four LEDs in the base keep you informed of your headset battery status at all times.
Noise-canceling microphone	Enhanced call clarity by reducing wind noise and eliminating background noise from the office.
150 Hz - 6.8 kHz wideband audio	The Jabra GN9330e USB's revolutionary new wide bandwidth sound makes PC-based IP telephony conversation exceptionally clear and characteristic, enhancing detail and quality.
Mute function	The mute button is easily accessed, stopping your voice from being transmitted when you have to consult with a colleague during a call.
Volume control	Intuitive controls facilitate easy volume correction.
2 wearing styles: • On-the-ear (ear hook) • Over-the-head (headband)	Choose the style that suits your personal preference. The soft and comfortable earpiece materials ensure optimum wearing comfort.
Outstanding connectivity	The USB base enables effortless, quick connection to PC-based IP telephony (softphones); the plug 'n' play setup ensures trouble-free, intuitive, daily operation. For softphone compatibility, please check www.Jabra.com/gn9300usb
PeakStop™ technology – max 118 dB SPL (RMS)	Protection against sudden, loud noises coming across the telephone network.
Digital security encryption	The Jabra GN9330e USB digitally encrypts your calls, giving you complete calling security and conversation confidentiality.
