•→ CS361 SupraPlus Wireless Binaural with Voice Tube

•→ CS361N SupraPlus Wireless Binaural with Noise-Canceling

A Hands-Free Approach to Business-Critical Communications

Wireless headsets transform the work environment by facilitating active collaboration and joint problem solving, increasing employee accessibility, and enhancing the ability to multi-task. The SupraPlus Wireless headset is ideal for contact center managers, knowledge workers and their support staff, office professionals with phone-intensive duties, and any employee requiring optimum communication quality or sound isolation in loud environments.

Choice of Voice Tube or Noise-Canceling Microphone

Select a flexible and discreet Voice Tube boom or choose a Noise-Canceling microphone if you need to filter out background sound.

Monaural and Binaural Style Options

Monaural models give you the ability to converse with coworkers without removing the headset. Or, for total-focus sound reduction, choose a Binaural model.

HL10 Handset Lifter Accessory

The HL10 Handset Lifter adds the convenience of one-touch answering and ending calls while away from your desk by automatically lifting your deskphone handset when a call comes in.

Sound Innovation for missions to the moon. And for everyday life on this planet, too.

In 1969, a Plantronics headset carried the historic first words from the moon: "That's one small step for man, one giant leap for mankind." Today, we're the headset of choice in mission-critical applications such as air traffic control and 911 dispatch. This history of proven sound innovation is the basis for every product we build—whether it's for work, for home or on the go.
