Vizia +® lighting controls have an all-digital design, coupled with an elegantly simple user interface, resulting in exceptionally intuitive, easy-to-operate controls. The return-to-neutral design provides the ultimate in visual and tactile appeal. The dimmers feature a fade ON/fade OFF, selectable fade rates and minimum brightness levels. The Energy Save mode allows users to decrease the maximum brightness level to reduce energy consumption. The matching remote tracks and displays the same green LED lights as the dimmer. They are ideal for new construction as well as retrofit applications and can be used in a host of commercial applications, from restaurants and medical offices to hotels and office buildings.
